# Getting Started

To get started, launch the application from the iPhone or iPod Touch's home screen.

To start studying, refer to page 3.

To create a new deck of cards, tap the *create deck* icon in the upper right corner.

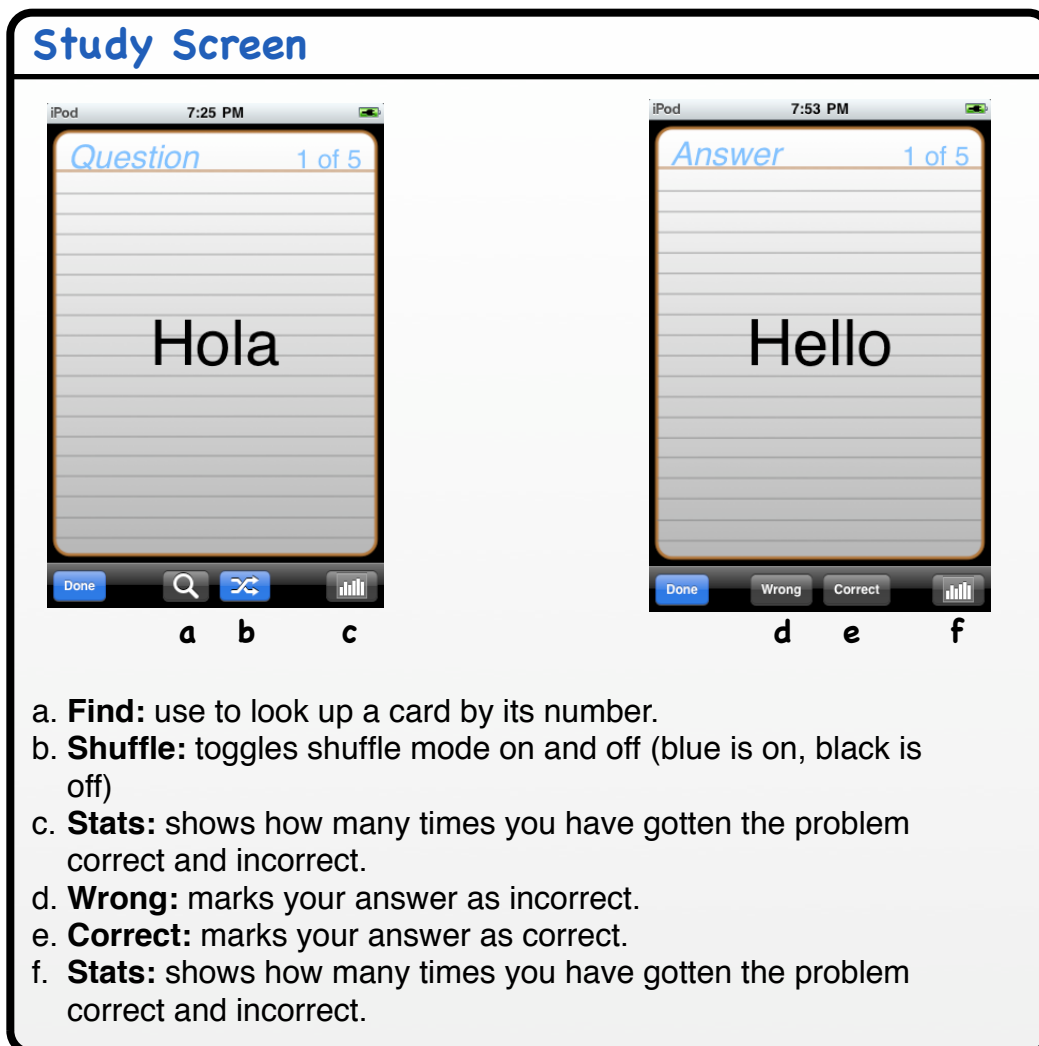

1. It's time to select a category. You have one of two options. First, you can pick an existing category from the scrolling list. If you want to create a category that is not there, you can tap the *create new* tab towards the top of the page. Now, you can type in the name of your new category. Remember, this is the name of the icon that will appear on the "home" screen, and contain the decks.
2. When you have chosen your category, tap the *next* button in the upper right corner. Next, type in the name of the deck that you would like to create. Deck names can not be more than 10 characters long. Tap the *next* button in the upper right corner.
3. Now, you can add questions to the deck. To add a question, tap the '+' icon in the upper right corner. Type in the question and answer. Tap add, and repeat the process until you have all of the cards that you want. Remember that you can always add more cards in *edit* view.
4. You are done! Your deck will appear under your new category in study mode. To edit your deck, refer to page 4.

# Studying

When you open the application, you are presented with the category view. From this screen, you will be able to navigate to a deck of your choice.

## To study cards:

1. Tap on a category (if there are more than 9 categories, you can swipe from right to left to view more pages of icons. This is very similar to navigating the iPhone/ iPod home screen.)
2. Select a deck.
3. A card will appear. To flip the card over, tap anywhere on the screen.

# Editing

The edit view allows you to add, modify and delete categories, decks and cards.

To get started, open the app, and navigate to the edit (paper clip icon in the bottom bar).

## CATEGORIES

---

*The first screen presents you with a list of categories (the same ones on the main screen that you see when you start the application).*

- To **add** a category, tap on the plus icon in the upper right corner of the screen. Type in the name of the category and tap on *add*.
- To **delete** a category swipe over the name of the category from left to right (or right to left).

## DECKS

---

*When you tap on a category, you are presented with another list. Each item in the list represents a deck of cards.*

- To **add** a deck, tap on the plus icon in the upper right corner of the screen. Type in the name of the deck and tap on *add*.
- To **delete** a deck swipe over the name of the deck from left to right (or right to left).

## CARDS

---

*Choosing a deck will bring you to all of the cards in that deck.*

- To **add** a card, tap on the plus icon in the upper right corner of the screen. Type in the name of the card and tap on *add*. To save the card, tap the back button (in the upper left corner). The information is **automatically saved**.
- To **delete** a card swipe over the card from left to right (or right to left).
- To **edit** a card, tap on the card. You will be presented with the same view as you saw for adding a card. Type in the new information and tap the back button (in the upper left corner). The information is **automatically saved**.

# Settings

The settings view allows you to make changes to the settings that will be saved on your device, so next time you use the app, everything will be how you like it!

**Shuffle:** The shuffle setting allows you to turn on or off shuffle. You can temporarily change the shuffle setting in the *study view* by tapping on the shuffle icon (in the bottom right corner).

**Shake to Shuffle:** The shake to shuffle setting allows you to turn off the feature that allows you to shake the iPhone or iPod touch to advance to the next (random) card.

# Troubleshooting

PROBLEM	SOLUTION
Error when adding category	<p>Category names can not be more than ten characters long, but must be at least one character.</p> <p>If you are getting a message saying that the category already exists, you can click on that category to use it (either in the deck wizard or in edit mode)</p>
Error when adding deck	<p>Deck names can not be more than ten characters long, but must be at least one character.</p> <p>If you are getting a message saying that the deck already exists, you can click on that deck (in edit mode) to add cards to it.</p>
Can't delete category, deck or card	<p>Make sure that you are swiping from side to side (left to right or right to left).</p>
